Gene 34:357-362(1985).

Biochemistry 21:6620-6625(1982).

-!- FUNCTION: This protein is not a protease, but it activates plasminogen by complexing with it. As a potential virulence factor, it is thought to prevent the formation of effective barriers around the site of infection, thereby contributing invasiveness of the cells. "Nucleotide sequence of the streptokinase gene from a group-G
Streptococcus.";

Nucleic Acids Res. 17:1262-1262(1989).

-!- FUNCTION: This protein is not a protease, but it activates
plasminogen by complexing with it. As a potential virulence
factor, it is thought to prevent the formation of effective
barriers around the site of infection, thereby contributing
invasiveness of the cells.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Streptococcus sp. (strain 19909)
Bacteria; Firmicutes; Lactobacil
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Streptokinase
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 01-JUL-1989 (Rel. 11, Created)

"Complete genome sequence of an M1 strain of Streptococcus pyoge Proc. Natl. Acad. Sci. U.S.A. 98:4658-4663 (2001).
-!- FUNCTION: This protein is not a protease, but it activates plasminogen by complexing with it. As a potential virulence factor, it is thought to prevent the formation of effective barriers around the site of infection, thereby contributing invasiveness of the cells.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              STRAIN=SF130/13 / Serotype M1;
